

**United States District Court  
Central District of Illinois**

**Wireless Setup Instructions**

The United States District Court for the Central District of Illinois is now providing free wireless Internet access, also known as “the Service”. Any use of the Service must be in accordance with the Court’s Wireless Internet Policy. This policy can be found on the court’s website (<http://www.ilcd.uscourts.gov/>). Wireless access in a courtroom will not be provided unless approved by the judge presiding in that courtroom.

In order to connect to the Service, your computer must have a WiFi compatible network card installed (802.11b/g/n 2.4GHz). Once you enter the courtroom, your wireless card should detect the signal immediately. (Note: Some wireless card software may require additional procedures and/or setting changes. Please consult your user's manual, or contact your hardware or software provider for any additional assistance.) Once your device picks up the wireless signal, select the District Court wireless network. When you have selected the “Guest” SSID from your list of choices you should now be connected to the Internet.

SSID/Network Name = Guest
